Rest Secured.™

PGP® Encryption Platform

As organizations move toward protecting data throughout its lifecycle, businesses are proactively formulating enterprise data protection strategies to secure data at rest and in motion. The PGP Encryption Platform reduces the complexities of protecting business data by enabling organizations to deploy and manage multiple encryption applications cost-effectively from a single management console. The PGP Encryption Platform provides the automated services, centralized key and policy management, and extensible framework needed to deliver the robust, foundation services required by businesses today.

PGP Enterprise Applications

PGP Universal™ Gateway Email – Centrally managed secure email without client software.

PGP® Whole Disk Encryption – Comprehensive disk encryption for securing all files on desktops, laptops, or removable media such as USB flash drives.

PGP® Desktop Email – Desktop-based email and instant messaging encryption for desktops and laptops.

PGP® NetShare – Security for files shared on network servers.

PGP® Command Line – Automated encryption and digital signing for batch-processed data, network transfers, and backups on servers or mainframes.

PGP® Support Package for BlackBerry® – PGP email security for BlackBerry device users.

PGP Management Console

PGP Universal™ Server – An extensible framework for central management and deployment of the above PGP encryption applications.

PGP Product Packages

PGP® Desktop Professional – PGP Desktop Email & PGP Whole Disk Encryption protect sensitive data in email, instant messages, and on removable media.

PGP® Desktop Storage – PGP Whole Disk Encryption & PGP NetShare secure data on laptops, desktops, and shared on file servers.

PGP® Desktop Enterprise – PGP Desktop Email, PGP Whole Disk Encryption, & PGP NetShare secure confidential data in email, on laptops and desktops, and shared on file servers.
